

## MAINTENANCE

### BirdShades bird protection window film

Our BirdShades invisible bird protection window film is simple to maintain. To extend the lifespan of your bird protection film, regular cleaning is crucial. Here are some tips and tricks for achieving optimal cleanliness:

- **do not clean the first 30 days** after installation
- wet cleaning with mild soap solution
- soft cleaning cloths (NO microfiber cloth, wash leather), sponges or window squeegees with lambswool are recommend for cleaning the bird protection window film
- aggressive cleaning agents, abrasive materials, brushes, pointed objects or high-pressure cleaning are not suitable and can damage the window film.
- never dry-clean the surface

Cleaning intervals must be observed to ensure that the warranty claim is not voided:

- **Cleaning interval in areas with high air pollution:** 2 times per year
- **Cleaning interval in rural areas:** 1 time per year
